

# INVENTION DISCLOSURE

## 1. Invention Title.

### Cloud Connected Scale

## 2. Invention Summary.

This invention describes a scale connected by a relatively short range mechanism such as Blu-Tooth. If the users phone or tablet sees the scale and a configurable time since the last weighting as passed, it will alert the user to weigh. The weight would be available on mobile devices and the cloud for analysis and could be forwarded to physicians, weight trainers, etc.

## 3. Invention Description.

### a. Describe the invention in detail.

1. Mobile Device "Sees" Scale
2. Mobile Device Alerts User
3. Mobile Device Communications Weighing Event and data to Cloud
